Thank you Eron,

Re: Geotech labs, here are some labs that other performing parties are using:

- GRI which is a local geotech lab
- GeoTesting Express which appears to be located quite far away in Acton, MA
- NW Geotech in Wilsonville, OR
- Northwest Testing, Inc. which after some internet searching appears to be the same lab as NW Geotech (<http://www.nwgeotech.com/>)

Hope this helps!

Subject: Arkema - HxCDF Presentation

Hi Madi,

Mike asked me to send you the presentation from our February 9, 2021 meeting where we discussed some of the comments on the draft PDI work plan. Attached is the presentation, which includes a summary of the HxCDF issue.

On an unrelated note, do you know which geotechnical labs are being used by other parties in Portland Harbor? We have been planning to use NW Geotech Laboratory, but they have expressed some concerns about testing contaminated samples. Please let me know if you are aware of other geotechnical laboratories that are being used in Portland Harbor.

Thanks!
